DETAILED ACTION

- Note: In the previous restriction requirement, claim 18 was inadvertently grouped with the invention of Group I, whereas it should have been grouped with Group II. Applicant elected the invention of Group I on January 18, 2006. However, since the grouping of the claims has changed from the previous Office action, applicant must be given another opportunity to make an election.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5, 10-14, 19-23, drawn to load module creation including determining whether two processes access the same data and marking the data if that is the case, classified in class 711, subclass 130.
 - II. Claims 6-9, 15-18, 24-27, drawn to load module creation including linking objects, first and second programs, first and second memory areas, first and second symbols, etc., classified in class 710, subclass 130.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such

as use without linking objects, first and second programs, first and second memory areas, first and second symbols, etc., as required of invention II. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
